A screenshot of Human Rights Watch's rendering of the IJOP app, which authorities use to police citizens of Xinjiang, created from researchers' reverse engineering of the app. Human Rights Watch/YouTube

- **China is waging an unprecedented, high-tech crackdown in the Xinjiang region, home to a mostly-Muslim ethnic minority called the Uighurs.**
- **Officials there use an intrusive app where they are prompted to log extremely personal information like political views, use of birth control, and use of electricity at home.**
- **Human Rights Watch revealed how it works in a recent report. Scroll down to learn more.**
- **Visit Business Insider's homepage for more stories.**

Officials in Xinjiang, China's most oppressed region, use an intrusive, all-seeing smartphone app to monitor, track, and flag citizens for investigation or punishment.

A new report gives a glimpse into how it works, and allows the Chinese state a vast array of deeply personal
